

KANSAS FOR
OPEN SHOP.Every Man Is Entitled to
Work, Says Gov. Stubbs.No Bar Against Any Kind
of Honorable Labor.Union Provision in the State
Contract Is Cut Out.

(BY DIRECT WIRE TO THE TIMES.)

TOPEKA (Kan.) June 2.—[Exclusive Dispatch.] No preference will be shown union labor in State contracts under the present administration. This was made clear today at the meeting of the executive council, composed of all the State officials.

Some repairs were needed in the offices of the State Labor Commissioner and State Architect C. H. Chandler prepared plans and specifications for the work and was about ready to ask the architect provided that the work must be done by union labor.

When Chandler submitted the matter to the executive council it caught that clause about union labor.

"What does this mean?" asked Secretary of State Denton.

"State Labor Commissioner Johnson asked me to put in," said Chandler. "Well, that must be cut out," said Gov. Stubbs. "Every man with two hands is entitled to earn a living. The State does not propose to put up the bars against any kind of honorable labor."

"When we hire a man we don't ask him whether he is a Methodist, Presbyterian or Baptist. Neither should we ask him whether he was a member of a union labor organization."

"It is not in the interest of union labor that the State include such a provision in its contracts, and so long as I am Governor such a provision shall not be incorporated except over my protest."

All the other State officials approved the position taken by the Governor. The State Architect was directed to eliminate the union labor feature of the contract.

Open Shop on Tin.

WHEELING (W. Va.) June 2.—The open shop law passed by the American Sheet and Tin Plate Company has caused an ugly situation and today morning workers called on the various local unions for Sunday.

It is said that the new scale of wages, given with the "open shop" order, is a reduction of from 25 to 35 per cent. Ten thousand men are affected.

Baltimore Strike Likely.

BALTIMORE, June 2.—A general strike appears inevitable, as no agreement was reached at the conference today between President Porter of the Baltimore and Ohio Railroad and a delegation of international officers representing the machinists, blacksmiths and boiler makers associations.

BOSTON STRIKE FAILS.

CARPENTERS GO BACK. BOSTON, June 2.—Of the 1300 carpenters in Boston and near by towns who struck yesterday for an increase in pay, and a Saturday half-holiday, fewer than 100 remained out today and it was said that all would be back at work within a day or two.

Brute Shots Admitted to Bail.

NEW YORK, June 2.—When the announcement was made today that Alice Walsh, formerly of Chicago, would recover from her insanity, Cornelius Shea, formerly president of the Teamsters' Union, is alleged to have inflicted upon her, Shea was admitted to bail.

ANARCHISTS QUIET.

Declare Church Membership Contrary to Principles—Discussions Are Largely Academic.

[ASSOCIATED PRESS NIGHT REPORT.] LEIPZIG, June 2.—The anarchists in Germany are at present in conference here, and the attendance is large. Today the congress adopted a resolution declaring that membership in any church or religious sect was contrary to the principles of anarchism, and called on all anarchists to cease their membership in churches.

Dr. Friedberg of Germany read a paper in which he said that the cultural guild of anarchists should be fought for by cultural methods.

The discussions were purely academic and the police did not interfere.

DISPOSING OF FLEET.

SEATTLE, June 2.—Rear Admiral Uriel Sebree today announced his plans for disposal of his fleet of seven cruisers—the West Virginia, Maryland, California, Tennessee, Pennsylvania, Washington and Colorado, the last named vessel being due here from San Francisco at 8:30 o'clock tomorrow morning.

The three cruisers first named will leave next Monday for Mare Island to undergo repairs there. The remaining four cruisers of the American squadron, the Tennessee, Pennsylvania, Colorado and Washington, will shift to Bremerton, June 10, where they will undergo overhauling and repairs.

LOOK IT OVER.

Look over the bargains in merchandise, offered by Los Angeles merchants and thoroughly catalogued for easy reference, in today's classified advertisement columns in The Times, under "For Sale, Merchandise." All classes of goods for sale at genuine bargain prices are advertised in these merchandise columns. It is the purpose of the merchants, in placing these bargain features in this convenient form before the buying public, to make it possible for every prospective buyer of some particular article to find, without great effort or long delay, the article desired. And it should be remembered, too, that the buyer by using this catalogue in making his purchases is repaid in the saving he is able to make.

CHIEF OF STATE IS OUT FOR OPEN SHOP.

MOST SUCCESSFUL OF ALL.

The Times came within 155 columns of printing as much advertising during the month of May as the two next largest newspapers in Los Angeles combined.

The Times' record for the month shows a gain of 503 columns over the same period of 1928, the aggregate for May, 1929, being 4765 columns of paid matter. The average for each day of the month (including Sundays) was 154 columns, or 22 pages daily of advertising alone.

The Times gives patrons a large amount of reading matter as well as the big volume of advertising, and furnishes subscribers more for their money than is given by any other newspaper, at home or abroad.

LOSS TO PLANTERS.

COTTON CROP RUINED BY DELUGE OF RAIN.

Fifty Per Cent., Estimate of Experts on Amount of Product That May Be Saved, and Prices on Exchange Show Consequent Restlessness.

[BY DIRECT WIRE TO THE TIMES.]

NEW ORLEANS, June 2.—[Exclusive Dispatch.] Rain has fallen in the Gulf territory for thirty-six hours without ceasing. At times it has been a torrential downpour. The crop loss in the States of Louisiana, Mississippi and Texas will be tremendous. The cotton crop has been totally ruined in many places. As a result cotton was restless on the exchange today and fractional advances were noted all along the line.

It is believed sharp advances will mark the trading of the next few days, when the full damage to crops becomes known. In many localities in this State and in Mississippi, the situation with the farmers is desperate.

In Louisiana the rainfall for the twenty-four hours has amounted to as high as 5.70 inches, which was reported at Alexandria. In Central Louisiana there has been only one day of sunshine in the past eleven.

At Natchez, Miss., the precipitation was 4.15 for the past twenty-four hours, and at Jackson it reached 4.45. In Texas over an inch of rain is reported from Austin, which is still cut off by Pearl River, with no prospect of moving until the river falls several feet and gets into the Gulf.

The rainfall has averaged an inch a day here for the past seventeen days, the heaviest single rainfall being that of the twenty-four hours ending at 6:30 o'clock this morning, during which time more than four inches of water fell.

Trains are running over their own tracks into Jackson, with the single exception of the Gulf and Ship Island, which is still cut off by Pearl River, with no prospect of moving until the river falls several feet and gets into the Gulf.

Only in the rice belt of Louisiana and Texas is the downpour of rain reported. The rainfall has averaged an inch a day here for the past seventeen days, the heaviest single rainfall being that of the twenty-four hours ending at 6:30 o'clock this morning, during which time more than four inches of water fell.

Trains are running over their own tracks into Jackson, with the single exception of the Gulf and Ship Island, which is still cut off by Pearl River, with no prospect of moving until the river falls several feet and gets into the Gulf.

PRESIDENT AT TRAVEL PLANS.

Mr. Taft Arranging Stops on His Western Trip.

Promises Aide to Make Address in Tennessee.

Will Visit the Coast States Southward, Returning.

(BY DIRECT WIRE TO THE TIMES.) WASHINGTON, June 2.—[Exclusive Dispatch.] President Taft, though not sure that Congress will adjourn within the present month, nor certain that he will be able to make his trip, is so optimistic that he is constantly arranging new plans and dates for stopping and speaking.

Representative Taylor of Colorado followed with an urgent invitation to attend the trans-Mississippi Congress at Denver, from August 14 to 21. The President replied that he had promised to be present on that occasion if he could, and he thought he could. His visit to Denver will be a part of his Western Coast-Alaskan tour.

Returning, the President will visit the Pacific Coast States, southward and return by the southern route through the States below the Mason and Dixon line to Washington.

LEMONADE FOR SENATE.

OFFICIAL BEVERAGE.

(ASSOCIATED PRESS DAY REPORT.) WASHINGTON, June 2.—Lemonade, not of the "pink" variety, but made with plenty of lemon juice, is Dutch standard sugar and much mineral water, is to be the popular beverage at the Capitol among the distinguished members of the United States Senate. Following closely on the warm colloquy over the lemon schedule in the Senate yesterday it developed that the statesmen in the upper House of Congress want lemonade to quench their thirst during the tariff debates.

That the beverage will be on tap in regular quantities after this is the result of a good-natured "kick" registered by Senator Gallinger at yesterday's session.

Some Senators curiously inquired if this was an antagonistic step against the water wagon, whereupon it was explained that the demand for lemonade was prompted by the fact that the duty on lemons will soon be increased 50 per cent, and that it is now the time to get most satisfaction out of it at least cost.

OFFICIALS GUILELESS.

JUDGE MECK CASE.

(ASSOCIATED PRESS NIGHT REPORT.) WASHINGTON, June 2.—The charges against Judge Edward Meck of the United States Court at Dallas, and United States Attorney William H. Atwell of the Northern District of Texas, were wholly without substance, it was learned today. The purpose of securing a delay in the prosecution of a man whose offense against innocent victims in the use of the mails deserved the severest punishment.

This was the announcement made today by Attorney General Wickham after a thorough examination of a complaint by persons in Dallas, representing William H. Atwell, who had been convicted of fraudulent use of the mails and later of perjury during that trial. He charged Judge Meck and Atwell with improper conduct in his trial.

ASKS NEW POSTOFFICES.

FOR SOUTHERN CALIFORNIA.

(BY DIRECT WIRE TO THE TIMES.) WASHINGTON, June 2.—[Exclusive Dispatch.] Acting on a petition of the chairman of the San Diego County Board of Supervisors, Frederick S. Stearns, and about forty others, Congressman Smith has recommended to the Postoffice Department that a postoffice be established at Encinitas, six miles from San Diego, and that John Knickerbocker, storekeeper at Encinitas, be appointed postmaster.

Congressman Smith has also recommended that a postoffice be established at Ocean Beach, three miles east of Point Loma and two and one-half miles north of Pacific Beach, and that Herriet A. Cole be appointed there. Miss D. Moffitt has declined to accept that appointment.

Difficulty has been experienced in getting some one to serve as postmaster at Hickey, San Bernardino county.

F. D. D. Humble has resigned. H. V. Ray, appointed December 18, last, and E. E. Williams, appointed April 24, last, declined to serve.

Petition has been filed for appointment of H. M. Henning, and Congressman Smith has recommended that he be named.

DICKINSON TO INVESTIGATE.

LINE TO CUT OUT PANAMA.

(ASSOCIATED PRESS NIGHT REPORT.) WASHINGTON, June 2.—Secretary Dickinson will, within a few days, take up the issue raised by the notice from the Pacific Mail Steamship Company of its intention to withdraw the Panama service maintained by that company during the coming summer, unless a satisfactory arrangement as to the portion of the pro rata received by the company from the United States to New York can be made. The company contemplates giving up the service because of its unremunerative character. The rate received in shipments from the West Coast to the isthmus and thence via the Panama Railroad and Steamship Company to New York is 50 per cent, of which the Pacific Company receives 25 per cent. Drake, the vice-president and general manager of the Panama Railroad Company, is expected to visit Washington in a few days to talk with Secretary Dickinson about the matter.

WASHINGTON BRIEFS.

Honors from Canada.

WASHINGTON, June 2.—Secretary of Agriculture Charles C. Glavin, Pinchot, chief of the Forestry Service, left here today for Montreal, Canada, where he will confer with the Canadian government on the subject of the Canadian National College, on which occasion Secretary Wilson will make the principal address.

SPURRED ON TO SUICIDE.

One John Pace Reads of Another's Successful Attempt and Imitates Him.

(BY DIRECT WIRE TO THE TIMES.) JONESTOWN (Ark.) June 2.—[Exclusive Dispatch.] On reading a newspaper account of the suicide of John Pace, aged 15, of Batesville, Ark., John Pace, aged 15, of Jonestown, drank the contents of a half-pint bottle of turpentine, and remains in a dangerous condition, although physicians' prompt work prevented immediate death. His girl had killed him. The Batesville suicide's father had accused him of feigning illness rather than work.

MILLIA ORDERED OUT.

(Continued From First Page.)

statement this evening regarding his decision in sending the militia north: "As long as the strike was confined to employer and employee I would not interfere, but when human lives are in danger and property destroyed it is necessary for the militia to be called out to restore order. If this is not a sufficient number of men I will have more men sent to get at once. Thousands of persons lined the streets and crowded the depot this evening to see the National Guards depart. Cheers from as many throats went the air. Handkerchiefs waved, and old men of the G.A.R. shook hands with the men to wish them Godspeed and success in their work of restoring peace to the town and safety to the inhabitants.

M'CLOUD SPENDS SLEEPLESS NIGHT.

(ASSOCIATED PRESS NIGHT REPORT.)

LISBON, June 2.—The power-house and lighting plant at McCloud were captured by the striking shingle mill hands today, and the town is in darkness tonight. Between 500 and 400 armed strikers marched on the plant in a body late this afternoon, drove off the guard and took possession, compelling the men to quit the plant. The strikers received warning of the intention of the strikers to capture the plant, but did not leave until ordered to do so. Not a shot was fired, and no one was hurt.

No damage had been done to the machinery of the plant up to this time. The last message was received from McCloud tonight. The strikers are still in possession of the plant, and no effort has been made to use it. The result of the capture of the lighting plant is that the town is in darkness, as well as the company buildings, hospitals and administrative buildings are in darkness, save for a few candles and oil lamps that glimmer here and there.

Six hundred strikers formed in line and paraded the streets between 5 and 6 o'clock this afternoon. There was no disorder, but the strikers were armed and the men of the company and the men of the town were unarmed. The strikers were undisciplined, their number greater than at the beginning of the strike and their determination to fight to a finish as strong as ever, despite the rumor that five companies of State militia were en route to march to the support of Sheriff Howard.

Gov. Gillett admitted this afternoon that he needed help to handle the situation. In reply to the sharp criticism of Gov. Gillett, which has been going on since the strike began, the governor said that he should have arrested the ringleaders, he said that to have done so would have precipitated a riot he could not hope to quell which must have resulted in the loss of human life.

L. A. Quale, president of the McCloud Shingle Company, arrived in Lisbon today and slipped quietly into McCloud this afternoon, making the trip in a private automobile. He held several conferences with Assistant Adjutant-General Bradbury and Sheriff Howard on his arrival. There, but declined to make any public statement. The strikers, it is said, had expected to send delegates to confer with Gov. Gillett, but in their disappointment and chagrin over this they determined to shut down everything in the town and the march on the light plant followed.

The machine shops of the company were included in their programme and the machinists and their helpers told to quit work with the result that the plant is completely tied up. After this display of the determination of the strikers, Col. Bradbury telegraphed Gov. Gillett asking that troops be sent. News that several companies of soldiers are hurrying northward will arrive at Lisbon in the early morning has created a profound sensation in Lisbon and McCloud. Some of the strikers fear that this will incite the wilder and more reckless spirits among the strikers to acts of violence and revenge and that the strikers will be reported up to a late hour there was little sleep for the citizens tonight.

The company will afford the company an opportunity to reopen its plant with the loyal employees, who comprise nearly half the force. Many of these men who did not join the strike have already left to seek work elsewhere rather than wait for the reopening of the mill here.

DOORS OF MILLS BATTERED DOWN.

(BY DIRECT WIRE TO THE TIMES.)

MARYVILLE (On Board Militia Special) June 2.—[Exclusive Dispatch.] All control over the Greek and Italian strikers at the McCloud River lumber camp in McCloud was wrested from the authorities today by internal rebellion. Release from any semblance of authority excited the unemployed army to batter down the doors to the car shops and mills, driving the few workers from their places and resulting in a general raid.

All who could escape left in the early hours today. Authority is smothered by mob violence. No semblance of restraint exists in the town. Protection from the mob was out of the question when the pumps were forcibly stopped. Five millions of dollars in booty will be abandoned to the looters if they raise their hands to demand it. The white residents are ready to surrender their property as a premium for safety.

Repeated pleas and requests from Sheriff Charles E. Howard, Capt. Bradbury and individual petitions telegraphed by the people resulted tonight in the Governor's commanding the companies to be rushed to the

LEADS STATE TROOPS TO QUELL RIOTERS.

(BY DIRECT WIRE TO THE TIMES.)

WASHINGTON, June 2.—With the adoption of a resolution providing for day and night sessions, beginning tomorrow, the Senate heard today a suggestion of a policy for limiting dilatory motions, which caused an earnest protest from Senator Bacon and others. The Vice-President, basing his action upon a precedent made in the last Congress when the Aldrich-Vreeland currency bill was under consideration, held that the absence of a quorum could not be called to the attention of the Senate if the Senator occupying the floor declined to yield for that purpose.

Senator Bacon declared this was one of the revolutionary rulings made when the currency bill was under consideration and that under the new rule there would be serious abuse of parliamentary rules. He announced his intention to obtain a full consideration of this question by the introduction of a resolution to be considered by the Committee on Rules.

A long speech, dealing with the pledge of party leaders with respect to a revision of the tariff was begun by Senator La Follette and will be continued tomorrow.

By numerous quotations he maintained that no question could be raised as to the pledge of the party for a revision downward and declared that before he would demonstrate that on the whole the pending tariff placed the customs duties above the Dingley rates. Since the enactment of the Dingley law and until 1904, he said, the control of trusts had been extended to 1904 with a capital of more than \$20,000,000.

INCREASE IN COTTON.

Senator Nelson quoted numerous comparisons between the existing laws and the pending measure, with the intention of showing that, in the cotton schedule, the rates had been raised from 20 to 30 per cent. above the Dingley law, by the substitution of specific for ad valorem duties.

Senator Gore again quoted dividends and surplus earnings of New England cotton and wool manufacturing companies, taking into consideration both successful and unsuccessful cotton and woolen mills, a profit of not more than 6 per cent. had been realized by New England manufacturers upon their investments in these industries.

Senator Elkins spoke at length, advising a duty on coal and petroleum. The cotton schedule was constructively under consideration all day, but no feature of it was voted upon. Referring to the cotton and woolen manufacturers, and in a rasping and sinister tone, Senator Gore said he did not blame them for their large earnings.

GORE SARCASTIC.

"I know they are intelligent citizens," he said, "judging from their success in the selection of United States Senators."

He referred in sarcastic language to the statement made yesterday by Senator Lodge that some of these large earnings resulted from sales of real estate, and that the cotton and woolen manufacturers had not divided their earnings "on the square" with their laborers. Senator Nelson followed.

Mr. La Follette discussed the protective tariff in its relation to monopoly. He urged that a direct result of prohibitive rates of duty, he prophesied that the best packers would prosper and the woolen manufacturers would be ruined.

When the Senate was again called to order Mr. La Follette appeared much refreshed and said that there was no occasion for the anxiety of his friends.

GREAT SNOW BANK MELTS.

Volcanic Disturbance Believed to Be Cause of Strange Phenomenon in Colorado.

(ASSOCIATED PRESS NIGHT REPORT.)

GRAND JUNCTION (Colo.) June 2.—An immense snow bank, sixty feet deep, lying on the slope of Mount Elliott, a 12,000-foot peak in Southwest Colorado, has melted within forty-eight hours and a great column of steam rising from the spot is visible for miles. It is believed by those familiar with the mountain that the phenomenon is caused by volcanic disturbance. A mine located near the basin and worked years ago was abandoned because of the intense heat encountered in the lower levels. The deep snow on the mountain prevents close investigation.

BREWERS SEE REACTION.

At National Convention They Declare That Anti-Saloonists Have Over-shot Mark.

(ASSOCIATED PRESS NIGHT REPORT.)

ATLANTIC CITY (N. J.) June 2.—Declaring that the "professional advocates of the anti-saloon league have over-shot the mark," the board of trustees of the United States Brewers' Association, which opened its forty-ninth annual convention here today, went on record with the additional declaration that the so-called "prohibition wave" in had reached its height and that "reaction is already beginning to set in."

These statements were contained in the annual report of the trustees.

"The political character of the agitation in some States," the report says, "has become apparent and there is a disposition on the part of the more thoughtful and responsible journals to discuss the drink question in a sane and constructive manner."

Touching on national legislation, the report stated that it is to be regretted that at each recurring session of Congress there is an increase in the number of members who seek to destroy the mark and that their statements are grossly exaggerated where they are not purposely misleading.

On the other hand, the report stated that the board of trustees of the United States Brewers' Association, which opened its forty-ninth annual convention here today, went on record with the additional declaration that the so-called "prohibition wave" in had reached its height and that "reaction is already beginning to set in."

LONG HOURS FOR SENATE.

Day and Night Sessions to Begin Today.

Cotton Schedules Issue of the Entire Day.

Senator La Follette Begins Long Speech.

(ASSOCIATED PRESS NIGHT REPORT.)

WASHINGTON, June 2.—With the adoption of a resolution providing for day and night sessions, beginning tomorrow, the Senate heard today a suggestion of a policy for limiting dilatory motions, which caused an earnest protest from Senator Bacon and others. The Vice-President, basing his action upon a precedent made in the last Congress when the Aldrich-Vreeland currency bill was under consideration, held that the absence of a quorum could not be called to the attention of the Senate if the Senator occupying the floor declined to yield for that purpose.

Senator Bacon declared this was one of the revolutionary rulings made when the currency bill was under consideration and that under the new rule there would be serious abuse of parliamentary rules. He announced his intention to obtain a full consideration of this question by the introduction of a resolution to be considered by the Committee on Rules.

A long speech, dealing with the pledge of party leaders with respect to a revision of the tariff was begun by Senator La Follette and will be continued tomorrow.

By numerous quotations he maintained that no question could be raised as to the pledge of the party for a revision downward and declared that before he would demonstrate that on the whole the pending tariff placed the customs duties above the Dingley rates. Since the enactment of the Dingley law and until 1904, he said, the control of trusts had been extended to 1904 with a capital of more than \$20,000,000.

INCREASE IN COTTON.

Senator Nelson quoted numerous comparisons between the existing laws and the pending measure, with the intention of showing that, in the cotton schedule, the rates had been raised from 20 to 30 per cent. above the Dingley law, by the substitution of specific for ad valorem duties.

Senator Gore again quoted dividends and surplus earnings of New England cotton and wool manufacturing companies, taking into consideration both successful and unsuccessful cotton and woolen mills, a profit of not more than 6 per cent. had been realized by New England manufacturers upon their investments in these industries.

Senator Elkins spoke at length, advising a duty on coal and petroleum. The cotton schedule was constructively under consideration all day, but no feature of it was voted upon. Referring to the cotton and woolen manufacturers, and in a rasping and sinister tone, Senator Gore said he did not blame them for their large earnings.

GORE SARCASTIC.

"I know they are intelligent citizens," he said, "judging from their success in the selection of United States Senators."

He referred in sarcastic language to the statement made yesterday by Senator Lodge that some of these large earnings resulted from sales of real estate, and that the cotton and woolen manufacturers had not divided their earnings "on the square" with their laborers. Senator Nelson followed.

Mr. La Follette discussed the protective tariff in its relation to monopoly. He urged that a direct result of prohibitive rates of duty, he prophesied that the best packers would prosper and the woolen manufacturers would be ruined.

Give Up Vacation for Boys' Benefit. Quartette of High School instructors and city school principals, who will have charge of the Y.M.C.A. vacation school.

CHINESE EXPLAINS HOW HANDS BECAME CALLOUSED. That his hands had become calloused from handling money, and not from toll in the Chinese vegetable gardens, was the unique plea made by Lui Tim yesterday before United States Commissioner Van Dyke. He was arrested by immigration inspectors on the charge that he had lost his status as a merchant by engaging in manual labor. Deputy United States District Attorney Stewart laid much stress upon the fact that Lui Tim's hands bore the marks of hard work, and that he was a member of a firm doing business in Chinatown.

BEN ELLIOTT AGAIN UNDER DARK CLOUD. BEN ELLIOTT, the youthful self-confessed Tropic burlar, became the central figure in the Anna Poltera murder inquiry again yesterday. Marshall Stanchfield, who had been in the hills near Glendale, in which city Elliott was arrested after his sudden disappearance from his old haunts in the hills near Glendale, turned the tide again toward the youth. Yesterday afternoon Stanchfield, who has been working on the case, reported to the Sheriff that he is convinced that Elliott rode into Redondo on a bicycle instead of on a lumber wagon, as he told the police, the Tuesday morning after the Poltera girl was slain.

THE OIL INDUSTRY.
ASSOCIATED GETTING PIPE.
Five Hundred Cars to Bring It from Ohio.
Have Manufacturers Taken Payment in Bonds?
Route Will Be Coaling to Port Costa.

That the Associated intends to build two pipe lines from Coalinga and McKittrick to Port Costa and Port Harford, notwithstanding the move of the independent, is proven by heavy shipment on route from Zanesville, O. for moving which the Harford line are assembling some 500 cars at Coalinga, where the shipment will be delivered by the Harford line. The goods are bought from the Harford Manufacturing Company of Zanesville, O., and it is thought by some that the concern has taken Associated's bonds in payment. Such a course would not be unusual and if the bonds have been placed elsewhere no intimation of the fact has been heard. The Associated is now Coalinga will go to Port Costa as first announced. The report that it was to go to Port Harford or Oviola was clearly a case of confounding it with the Independent's enterprise. A theory as to the backers of the Harford's pipe line that is interesting to say the least, and that has been advanced, is that the British owners of the California Oil Fields, Ltd., of Coalinga, whom it has been rumored again and again, were considered a pipe line to Port Harford and the purchase of the big refinery that has been standing idle for more than two years, have taken hold. It will be remembered that there have been rumors of the purchase of the big refinery by some one connected with the Harford movement.

Invents Fishing Tool.
W. E. Hodge, manager of the Imperial and thirty-three, has invented a fishing tool that is claimed to have several important advantages. It is a result of practical experience and has been shown the least disposition to take up with any combination, and it will be quite a little time before its contract with the Standard is out. Moreover, the pipe-line promoters are not backing in Pacific Coast capital. Still there are men of wealth here interested in the limited who might contribute a pipe-line company.

New Devil's Den Company.
The Cosmo is a new company incorporated by R. P. Holzer, Claude R. and H. P. Jensen, all of Coalinga, to operate half a section in the Devil's Den. It is looking stock at Coalinga.

MINES AND MINING.
ANOTHER LOST MINE IS FOUND.

CROWDER'S RANCH SCENE OF LATEST DISCOVERY.
One Lost at the Time of the Mexican War—As Usual, There is a Fortune Ahead and a Romantic Story of Early Days—Operations in Sonora by Local Men.

James W. Bailey and J. R. Cunningham, two old-time California prospectors, have discovered what they believe to be a long-lost Spanish gold mine, between Crowder's ranch and the headwaters of Little Creek, in Cajon Pass, according to the finders, this old property was abandoned at the close of the Mexican War. While searching for an old ledge, thought to exist on Crowder's ranch, Bailey explored all of the surrounding country, accompanied by Cunningham, in charge of the ranch at the time, and came across a patch of rock wall or ledge, apparently of human handwork. Many lost mines and buried treasures cluster about the hills on the west, remembering the pile of rocks and debris, it is to be said, Spanish. An oven, two Spanish lead pipes, the hip bone of a human body and relics of days when California was in its infancy were found.

Arispe Development.
Arispe development in gold, silver and copper is more marked at present for many years, according to Graham, an old-time mining man of Mexico. Mr. Graham is in the mining business and asserts that the development in Arispe properties is exceptionally good. The old Bavarian has just broken into Spanish-French workings, driven down a shaft and found this. The mine is in for more than 1500 feet, when encountered in the recent development, \$100,000 worth of ore was found to be blocked, all of grade running 35 per ton as it goes in the mill. A great deal of the ore is as high as 10000 cents to the ton, the gold running to twenty-five ounces. (Nab.) people are operating the property and will put up a 375-ton daily. Grading has already started. Three miles south two big copper properties are being developed.

one, the Washington owned by Dickson and Bostick making a particularly good showing. A shaft has been sunk on the side of a big blow-out, cutting the sulphur at 1000 feet, and continuing in more to 1500-foot point, the ore is the shaft averaging 4 per cent copper. When the crosscut was within sixty-five feet of connecting with the level at a point 150 feet below the surface it struck the ore body mentioned, in which it continued solid to connection.

East of the Washington, the San Lorenzo, formerly owned by Martin Hickinson, and sold by him to El Paso people for \$25,000, the developing some good big bodies of high grade running close to 100 ounces silver. Shipments of several cars netted \$25 to the ton. Work at present is confined to development.

The mines northeast of the San Lorenzo, Jack O'Brien and the Toran brothers have a tunnel in eighty feet in solid ore, there not being a pound of waste on the dump. The rock assays six ounces silver and \$1.50 gold with five and a half copper. All of the above development is on the west side of the Sonora River. On the east side a great deal of development is in progress and operations under way for considerable more. There are promising claims that bid fair to make good-producing mines with proper development. Little has been done with any of these with the exception of "Antisana" and this is long ago that only the old residents have any knowledge of the work.

The Santa Rosalia has resumed after twelve years' silence. The Colorado has shut down, temporarily, on account of water scarcity. The Las Chispas, twenty miles south of Arispe, one of the largest gold silver properties in Mexico, is installing a water line and aerial tram from the top of the mountain to handle the mine output. It is working a small force which is to be increased to full capacity when the work on hand is completed, August 1.

The El Carmen in the same district and owned by the same people, has opened a large body of high-grade silver. The outlook for the southern part of the Arispe district is better than ever before on account of the settlement of the Taqui trouble, which has cleared the way for the capital which has steered clear of this section in the past is seeking investment, and mining is active. A railroad is projected by the Washington people up the Sonora River, starting at Urua, San Juan and extending to Sinsuipi, tapping the rich mineral fields.

Near Nacozari.
The Silver Seal Exploration Company, organized in this city, with only twelve stockholders to date, started work last August on property fifteen miles from Nacozari, Sonora. It is mostly tunneling and about 800 feet of development has been done. One tunnel is run in 150 feet below the apex and another prospect tunnel is in eighty-five feet. A shaft, now down to 100 feet, is being sunk to cut the ledge. Six cars have been handled at the Copper Queen smelter at Douglas, from which net returns of \$10,545.25 have been received after paying all duties, charges, etc. A seventh carload has gone in and returns are awaited from it. Eight more are being loaded. The ore carries a little iron, which is eagerly sought by the smelter and the owners get 5 cents per unit for it. At the surface values are mostly gold, but with depth there is less of silver and copper. There are 250 acres in the holdings. The company's officers are: J. A. Judah, president; F. M. Smith, vice-president and treasurer; R. E. Finney, secretary and treasurer; J. W. Utter, assistant secretary and treasurer, all of Los Angeles or vicinity. They claim that the company owns the property, has sold no stock and whether it ever does or not is a matter for the future.

Besides the claims mentioned, the company has forty acres fifty miles south of Nacozari which will be about eighteen miles from the Southern Pacific's new line. At sixty feet ore is obtained running eighteen ounces silver and 15 per cent copper.

Public Demonstration.
A public demonstration of the Kelly Process Oil Burning Smelter will be given Friday at the experimental plant of the Kelly Process Oil Burning Smelter, at St. Andrew street. Officials of the company say that the successful working of the plant, generally, has had to see it in operation. An oil-burning smelter means much for the mining industry of this section if practicable, efficient and economical, as the high cost of coke has prevented many needed smelters being built.

The demonstration will last all day, the furnace to be fired at 9 a. m. A delegation of mining men and representative members of the Chamber of Mines will attend.

Angelenos in Tepic.
Marshall F. Wright has returned from a stay of two months in Tepic, Mex., where he is operating the Cerro de la Cruz, a rich gold property, lying on the line of the new Harford railway. Mr. Wright states that the installation of the mine is progressing as rapidly as possible and the underground work is showing the property richer than anticipated when the purchase was made some months ago. Large amounts of rich ore have been blocked and a good profit has been realized from the operation of the five-stamp mill. With the new machinery and additional stamps handwork returns will be made. Future development will be on a large scale.

LOCAL RAILROADS.
TIES AND RAILS
FOR SANTA FE.

HUNDREDS OF THOUSANDS OF SLEEPERS NEEDED.
Inability to Secure California Redwood Forces Line to Import Them. Eastern Roads to Open Joint Office. Santa Fe Traffic Officials Off to Seattle Meeting.

The Santa Fe is using a million ties yearly in renewal work west of Albuquerque. Most of them are being laid in this State. These are imported from various parts of the world, notwithstanding the fact that California redwood makes the finest railroad tie for this climate ever grown. Since last January 350,000 ties have been discharged from vessels at San Pedro and San Diego, consigned to the Santa Fe. These have been laid between Los Angeles and San Diego, and at various points on the Coast and Valley lines. A million more are contracted for, and will be delivered in the year. They will come from Japan, Australia, South America and Siberian Russia.

At present the Santa Fe is doing little in the way of reconstruction. It is rebalancing and relaying rails between Los Angeles and San Diego. As soon as the necessary rock can be secured, work will start on the rebalancing of the San Joaquin Valley line. There the tie situation is critical on the San Diego branch, and a much more durable class of ballast is needed. The San Diego reconstruction should be finished by September 1. Thirty-six miles of steel have been laid, eighty-five-pound rails replacing those formerly used. Ninety-four miles remain to be completed.

Officials declare that imported ties are not equal to native California wood, which has proven the most durable, lasting and best suited for California conditions. The trouble is to get good hard redwood ties. Some of this class laid when the first steel was put down by the Santa Fe twenty-five years ago, are still down and in first-class condition. Inability to get these ties forces the railroad to contract for other woods abroad. Five thousand Ochal ties from Australia, 300,000 from Japan and 200,000 Lignum vitae from South America are included in those to be delivered on contract within the year.

Will Open Office.
The Minneapolis and St. Louis and the Iowa Central railways will open a joint office at the meeting of the Santa Fe, at the Hotel California, with Rolfe M. Jenks, commercial agent in charge. Mr. Jenks was for a number of years with the Erie and Indianapolis, later with the Santa Fe. He is expected here this week to arrange for the opening of the office.

To Attend Meetings.
Los Angeles traffic officials are leaving to attend meetings of freight and passenger associations at Seattle and Chicago. Representatives of the Santa Fe and Southern Pacific from Los Angeles and San Francisco are already en route to Seattle to attend the meeting of the Transcontinental Bureau next week, and to Chicago to attend the Transcontinental Freight Association conference.

T. C. Peck, general passenger agent of the Salt Lake will leave for the former city today, going East first to that place. A. T. Lewis, chief rate clerk of the Salt Lake, left last night for Seattle, where he will join his chief, F. A. Wann, after a visit of several weeks in the East, is in Chicago for the freight meeting in that city.

Summer Tourists.
The movement of summer tourists has started, and the railroads are looking for a considerable volume of this class of business, particularly during the Seattle Exposition. The Chicago Union Pacific and Northwestern tourist department is arranging for several excursions to California points this summer, the expectation being that a hundred people will join each of the parties. This line will take fourteen personally-escorted parties to Yellowstone National Park, Seattle, Colorado and other points. On Seattle, Colorado and other points will stop in this State for a few days. The return from Seattle will be made optional via Los Angeles or Canadian Pacific points. The first of these will leave Chicago June 8 and July 8 the largest of the parties will leave Chicago for Los Angeles direct, and will spend twenty-five days in this city, and nearby points. J. H. Pearson, assistant manager of the department, asserts that summer tourist traffic will be very heavy this year.

Shutting Tunnel Work.
The shaft which is being sunk at the south approach to the Los Angeles-Pacific tunnel between First and Temple streets has been connected with the main bore of the tunnel, though there remains a considerable distance to be cleared away before daylight is sighted. All of the core remains to be removed. To facilitate its removal, tracks have been laid into the cut where the steam shovel is working. Standardizing of the Hollywood track on Sunset boulevard is nearing completion, work being practically finished to the Sunset boulevard tunnel. This will be completed long before the tunnels are

A Banker's Advice

A Bank Teller was in the office of the President of one of our large banks the other day when a lady stepped in and asked the President's advice about purchasing a certain stock. The President advised her to buy it. After she had left the Teller said: "Why do you advise her to buy stock when you know she will immediately take money out of this bank to buy it, and we will lose her deposit?"

The President replied: "I know she will take her money out of our bank, but that is a narrow view. In the first place, this lady depends on my honesty. In the second place, the corporation I recommended is safe. In the third, place, if she didn't put her money in a safe company, she would be tempted to put it in some wildcat scheme and we would lose her deposit anyway. And fourth, if I had advised her not to invest, she would have blamed me for causing her to lose a chance to make money and would have accused me of advising her against investing, in order to keep her deposit. Young man, you must look at this question with a broader view."

The company he advised the lady to buy stock in was the Los Angeles Investment Company, and every bank president in Los Angeles is speaking well of this company, even though he knows that by doing so he will lose part of his deposits. The Los Angeles Investment Company is the largest and one of the oldest co-operative building companies in the world. You can start an investment with us in any amount (\$1.00 or more) add to it daily, weekly or monthly. You can draw your regular quarterly dividends, in cash, or have them re-invested, thus compounding quarter after quarter, year after year. No one has ever failed to get his money immediately upon demand, if he desire to sell his stock.

PHOENIX HAS 'PHONE FIGHT.

Epes Randolph Unable to Make Terms.

New City Electric Lighting Plant Proposed.

Bonus Nearly Raised for Buckeye Road.

(SPECIAL CORRESPONDENCE OF THE TIMES.) PHOENIX (Ariz.) May 31.—Since a number of the citizens of Phoenix secured a franchise for an independent telephone company and organized the Home Telephone Company, the Consolidated Telephone, Telegraph and Electric Company, which has hitherto served the city, has been making strenuous efforts to effect a coalition of interests. President Epes Randolph of the Consolidated made various proposals for amalgamation, sale of the existing plant, etc., all of which have been rejected. At the present time the Home Telephone Company is building an entirely new plant and a fight will follow for the survival of the fittest. Following on the heels of the Home Telephone project, a number of citizens are engaged in organizing an independent, or, rather, a new city electric lighting plant, and expect to ask for a franchise at an early day. They insist that the rates of the present company, the Pacific Gas and Electric Company, are entirely too high. They desire to make money, the object being merely to make money, the Pacific Gas and Electric Company, which has a contract for securing power from the government as soon as the plant at Roosevelt dam is completed, has promised better rates of service as soon as this cheap power is available, but has not yet announced the rates.

S. H. Mitchell, manager of the Phoenix City Railway Company, owned by M. H. Sherman of Los Angeles, has announced an extension of its Indian school line two miles and a quarter to the east and north, to be in operation by January 1, 1910. This will give service to an additional acreage of good land, suitable for suburban homes. The right of way for the proposed Phoenix and Buckeye Railroad has been secured, and the raising of a bonus is now well under way. The bonus asked for was \$100,000 in cash, in addition to the right of way. It will be impossible to raise that amount, but it is stated that enough of it has been promised to secure the building of the road. The bonus is not payable until the road is completed, rather, until some time afterward, if all plans carry. July 1, 1910, is given as the maturity of the bonus, though the company announces that it hopes to have the road in operation by November 1 of this year, and to Arlington, the present proposed terminus, by January 1, 1910. Incidentally, the bonus boosters are forming themselves into a club which will set a population mark of 50,000 for Phoenix in 1910.

In a small accidental fire near Phoenix the other day one of the things destroyed was a little 12-inch garden plot, that was owned by H. B. Patrick and prized as a treasure. Mr. Patrick is a civil engineer, and is the man who surveyed and started construction on the Maricopa and Phoenix Railroad, October 1, 1908. His little garden plot threw the first dirt on the railroad grade at Maricopa.

THE SANTA CRUZ RESERVOIR. Land Company has filed with the Territorial Secretary notice of the appropriation of 100 cubic feet per second, of water from the Santa Cruz river, creek, or river, in Pinal county, near the Pinal county line, about twenty miles south of Casa Grande on the Southern Pacific Railroad. The company proposes building a huge storage reservoir and canal system for watering the lands in the valley of the Santa Cruz River, which at that point sinks and becomes an underground stream the greater portion of the year. The Santa Cruz wash is the natural wet season drainage depression from the mountains to the south of the reservoir, toward the Santa Cruz River. Evidently the company proposes to fill its reservoir from flood waters in the mountains, not depending on the Santa Cruz for a water supply. Nothing is known here of the project, more than the filing of the water appropriation, which was done by L. H. Manning of Tucson, as president of the company, and Leo Goldschmidt of Tucson as secretary of the company.

Today closed a baseball series of three games in Phoenix, between the Phoenix and Prescott teams, in which Phoenix captured all three games. Ray Shoberg, formerly sporting editor and baseball writer on the Chicago Record-Herald, died in Tempe a day or two ago.

Seth Bullock of Deadwood, S. D., United States Marshal and a warm personal friend of former President Roosevelt, since his ranching days, passed through here recently, on route to Los Angeles to join his family.

FOR TEXAS BANKERS. Committee Appointed to Entertain Visiting Financial Men Here in July.

The Los Angeles Chamber of Commerce yesterday appointed a committee to prepare for the entertainment of 125 representatives of the Texas State Bankers' Association who will visit this city from July 13 to 25.

The step in Los Angeles will be one of the features of the annual excursion which is taken by the "long horn" bankers and which will be extended this year to the 25th of October.

The plan for the entertainment of the visitors have not yet assumed definite form, but it is probable that a visit to Catalina will be included in the "seeing Southern California" itinerary. The committee appointed by the local bankers consists of Charles G. Greene, John Alton, R. L. Rogers, A. B. Jones, A. J. Waters, James E. Gist, W. W. Wood, J. M. Fadden, H. F. Stewart, Charles H. Tolt, J. D. Bradford and Gen. Robert Wankowski.

TEMPLE FOR ROCKEFLERS. NEW YORK, June 2.—An important construction company here announced last night that it had undertaken the construction of a fountain, arbor and temple on the estate of John D. Rockefeller at Pocantico Hills and adjoining the new \$250,000 castle. A member of the construction company said that it was his understanding that the temple should be a private chapel for the members of the Rockefeller family.

EVENTS IN LOCAL SOCIETY.

THE faintest summer gowns and the daintiest pink and green decorations characterized the wedding last evening of Miss Winifred Llewellyn and John Miller, solemnized at 9 o'clock last night at the home of the bride's mother, Mrs. Hannah D. Llewellyn, of No. 238 West Adams street. Miss Llewellyn wore an elaborate hand-made gown of silver-embroidered net, made over heavy white satin. With this she wore a long tulle veil and carried a shower of white jasmine blossoms. The bride is a member of a distinguished family with a wide circle of friends. Mr. Miller is the son of Mrs. John Miller, widow of a prominent banker of this city. The bridegroom is a University of California man, and a member of the Chi Psi Fraternity, and is resident manager of a casualty company. Miss Mary A. Thomas of Niles, O., assisted as maid of honor. Her gown was of white princess lace embroidered in gold, made over satin. She carried a shower of Cedre Bruner roses. John Llewellyn, brother of the bride, was best man, and the bride was given away by her mother. Another brother, Becca Llewellyn, escorted her to the altar. Rev. Warren

Henry McKee, Miss Vickera, Mrs. J. R. Chapman, Mrs. Max Chapman, Mrs. Ward Chapman, Mrs. Robert McKee, Mrs. Benjamin Johnson.

Large Reception. Particularly attractive and fresh were the blossoms used yesterday to adorn the home of Mrs. Thomas W. Phillips, No. 2215 Harvard boulevard, who, with her daughter, Miss Angelita, entertained with a large reception. They were assisted by Mrs. Maurice Hellman, Mrs. Stoddard Jess, Mrs. Charles L. Nourse, Mrs. Erickson, Mrs. Mary Schaller, Mrs. A. J. Salisbury, Mrs. S. K. Lindley, Mrs. E. S. Rowley, Mrs. Percy Griffin, Mrs. Robert T. Toy, Miss Marie Muller, Miss Jessie Morgan, Miss Harriett Tate, Miss Sue Carpenter, Miss Fannie Todd Carpenter, Miss Maude Huntberger, Miss Grace Rowley, Miss Mary Lindley, Miss Lois Salisbury, Miss Julia Derby and Miss Lucile Oiler.

Engagement Announced. Announcement is made of the engagement of J. C. H. Ivins, a prominent real estate dealer of this city, and Mrs. M. Lona Lamson of Chicago. The wedding will be solemnized the 17th inst. at her home, Ivins will be at home to their friends after July 1, at No. 145 South Grand avenue.

Plan Pacific Trip. A number of well-known society people will sail on the steamship Manurewa June 24, for Honolulu, Japan and the Philippines. The party will include Mr. and Mrs. W. Runyan, Mrs. Mathilda Gleason, Miss Blanche Gleason, William E. Macdonald, Mr. and Mrs. J. Griffin, Miss Edith Runyan and Miss Helen Runyan.

To Wed Today. At the home of her parents, Mr. and Mrs. W. H. Lewis of Woodlawn avenue, Mr. and Mrs. Lewis will be married today. The wedding is of interest to a wide circle of friends, as both young people are popular here.

Returns Home. Miss Ella Holmes of Sacramento, who has been the guest of Mr. and Mrs. A. Selover of No. 1025 Arapahoe street, will return to her home, during her visit Miss Holmes was a center of attraction and many pretty functions were given to her honor. As a farewell courtesy her hosts entertained with a charming dinner party for ten of her girl friends. The party was bright with white blossoms and greenery.

SELL MORE STAMPS. Postoffice Figures for May Show, as Usual, Big Growth as Compared to Former Sales.

Sales of stamps by the Los Angeles postoffice in May, according to a statement just issued, amounted to \$96,171.70. In May, 1908, the stamp sales amounted to \$82,351.47, showing an increase of 16.73 per cent. in favor of this year.

Within the month the number of pieces of mail reaching the office either undirected or not addressed to street and number, for all of which searches were made through the post office, city directory, and the Home and Sunset telephone directories, was 25,701.

Following are statistics showing the disposition made of the pieces of mail having faulty or deficient addresses: Correct addresses found and forwarded to points outside of city, 48,743; correct addresses found and delivered by city letter carriers, 134,630; number of pieces sent to general delivery, 211,397; average number of pieces searched through directories monthly, 12,745; number of callers at general delivery, exclusive of Sundays, for month, 127,421; number of changes of addresses filed in postoffice in the month, 11,027.

Mr. and Mrs. George Logan will leave today for an extended trip East, by way of Louisville, on the Shriners special.

Wed in Topeka. A wedding which took place in Topeka, Kan., Tuesday evening was designed to be as nearly as possible a duplicate of the marriage of the bride's sister, Mrs. Harmon Ryus of Los Angeles, just four years before.

According to a dispatch received last evening by The Times from Topeka, the couple united in marriage there were Miss Anna Marie Nellis, daughter of Judge and Mrs. Dewitt C. Nellis of Topeka, and Albert Charles Phillips of Seattle, Wash. The marriage was at the Nellis town house. It was a brilliant event, attended by several hundred of the prominent people of the city. Mrs. Ryus, after whose wedding the nuptials were planned, was, before her marriage, the bride of Mr. Nellis. The bride wore the gown and the veil which her sister wore. The gown was of real lace, built over chiffon and heavy satin.

The bride was attended by several of the prominent girls of the State. Miss Metta Robinson, daughter of Mr. and Mrs. A. A. Robinson of Topeka; Miss Florence Reed, an heiress to a large fortune, who lives in Wichita; and Miss Blanche Beat of Kansas City, Mo., a beautiful girl, who is a celebrated pianist. The color scheme for the wedding was pink and white, and the bridesmaids all wore those colors.

Charles Albert Phillips of Seattle, cousin of the groom, was best man, and Duke Trempe of New York City, Dr. Merrill Lindsay and John Walters, both of Topeka, were groomsmen. Rev. L. F. Dornblaser performed the ceremony. The groom's gift to his bride were a gold harp and a gold necklace set with amethysts. Mr. and Mrs. Phillips will take a ten days' trip through Yellowstone Park, and will be at home after August 15 at No. 214 West Fifth avenue, Seattle.

Chauffeurs Expect Visitors. Capt. and Mrs. George French Hamilton, with their two young children, are expected soon on the United States transport Thomas. Since leaving the Philippines about six weeks ago, Capt. and Mrs. Hamilton have been visiting in Japan and China. They will spend two months with the parents of Mrs. Thomas, Lieut.-Gen. and Mrs. Adna R. Chaffee of No. 827 Magnolia avenue.

Deneth Garden Trees. Mrs. E. P. Johnson, Jr., Mrs. C. H. Dick and Miss Johnson yesterday afternoon presided at a tea, at the home of Mrs. Johnson, No. 823 West Twenty-third street. The affair was in compliment to Mrs. Gilbert Bladell of Long Beach, who is visiting here. Guests who entertained in the garden. Tea was served beneath the trees. The hostesses were assisted in serving by Mrs. H. H. Perry, Mrs. H. Char. Modini-Wood, Mrs. Walter Barnwell, Mrs. James H. Utley, Miss Sally Utley, Miss Sara Goodrich, Mrs. J. H. Paul, Chandler, Mrs. Fowler Shankland, Mrs. John G. Mott, Mrs. J. A. Fairchild, Mrs. Jack Jenne, Mrs. Arthur Bray, Mrs. Herman James, Mrs. Ely Lilly, Mrs. J. K. Urnston, Mrs. William B. Valentine, Mrs. Edward Hill, Mrs. G. O. Spencer, Mrs. William Lewis, Mrs. William Johnston, Mrs. C. E. Perry, Mrs. Waddell, Mrs. Ruffin, Mrs. Herron, Miss Edith Herron, Mrs. W. H. Howard, Mrs. Wortham, Miss Sarah Goodrich, Mrs. Read, Mrs. Ernest A. Bryant, Mrs.

REFRIGERATORS

Six Full Carloads at Money Saving Prices

If you need a new refrigerator buy it NOW and buy it HERE. We have six entire carloads of new refrigerators just from the factory. This lot includes the Ideal, the Illinois, the Automatic and the McCray—each make the best of its class. The lot includes all styles and all sizes. You can find a refrigerator as small as you want or as large as you want, and you can find one at the price you can afford to pay—and the best possible values for your money. Take advantage of these prices and buy your refrigerator now.

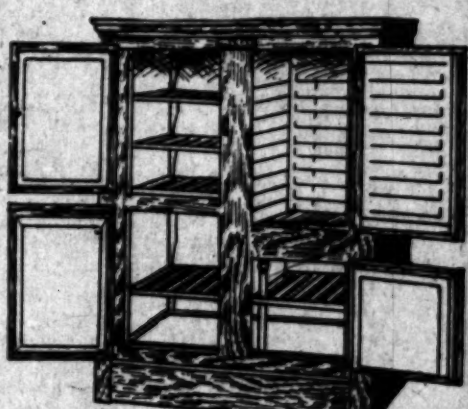

Special Refrigerators

We carry a complete line of the highest grade refrigerators in enamel, tile and opal glass lining. We also make a specialty of built-to-order refrigerators, putting in side or rear door, being from porch or outside the house. No matter what you want in the refrigerator line, we can supply you. Our assortment is the largest in the Southwest.

This "Ideal" Refrigerator Only \$8.00

Solid ash case—nicely rounded top—vacuum insulation—heavy tinted wire shelves in food compartment—all parts removable for cleaning purposes—absolutely sanitary—ice capacity 35 pounds—our price only \$8.

45-lb. ice capacity, \$ 9.75
50-lb. ice capacity \$12.75
75-lb. ice capacity \$15.00

This McCray Refrigerator Only \$34.00

Made of solid oak, antique finish, lined with odorless wood; ice capacity 70 lbs. McCray is unquestionably the world's best refrigerator—in quality and construction. Our price only \$34.00.

Additional Impetus has been given to the craze by the fact that the Countess of Warwick, one of the loveliest of English women, appeared the other day at her social wedding with her hair, in which two weeks before not a thread of white had been visible, entirely white. There was an amazed chorus of suppressed "ohs" as Lady Warwick entered the church, which gave way to exclamations of admiration when the women saw how the change became her. She had solved one problem which usually looms large on the horizon of advancing age, and stripped it of its terrors, for not only was she more beautiful than ever, but she actually looked younger than she had in several years.

A prominent Washington hair-dresser, according to a Post correspondent accounts for the craze on several grounds which appeal to reason. First, and foremost, gray hair is almost universally becoming. It imparts a softness to the face in spite of lines or wrinkles. Our ancestors anticipated us when they discovered the daily charm given by whitened locks, and obtained their effects with powder.

Gray Hair Won Prize. A striking illustration of the charm of powdered locks was given in the awarding of prizes at a Post correspondent accounts for the craze on several grounds which appeal to reason. First, and foremost, gray hair is almost universally becoming. It imparts a softness to the face in spite of lines or wrinkles. Our ancestors anticipated us when they discovered the daily charm given by whitened locks, and obtained their effects with powder.

When Shampooing, Beware. Apropos of white hair I heard the other day of the laughable predicament of one woman, who, when she shampooed her lovely gray hair, always took a little bit of bluing to give the rinsing water to give her hair the desirable clear white and prevent it from showing the least tinge of yellow which, we all know, is fatal to its beauty. In this case, however, she made the mistake of winding up the hair with a little bit of bluing, and she could appear in public without her hair retained its indigo shade until it finally wore off.

Rage for Rag Rugs. You may remember that I told you not long ago about the pretty postage and other rag carpet effects which are so popular. I read now that some of the wealthiest women in the East are furnishing their summer homes with rag rugs instead of the handsome oriental floor coverings that are a mark of luxury and elegance. I add to those who cannot afford to pamper every whim, the rooms are being repaired with simply sprigged effects and all evidences of up-to-date-fashions are being eliminated to be in keeping with these copies of the colonial rag carpets.

The firm which carries such a pleasing variety of these rugs tells me that the recent demand is something wonderful. A Ventura woman has ordered several for her country home, and many women are making them for themselves. In planning a special design with certain colors it is more satisfactory to simply buy the rug than the expensive cotton goods in the color desired. It is clean and new and costs but a few cents a yard. Of course white and black rugs can usually be found in abundance from the half-worn garments in any household.

Seen in the Shops. Thin collapsible go-carts are exhibited in the window of one of Broadway's big department stores. A pound box of talcum powder for twelve cents cheap these warm days. Saw "em in the window of the dry goods store yesterday.

There was literally standing room only around the four corners of the shops yesterday. Department store managers made a wise move when they insured these comfortable corners for shoppers.

The price of Val lace and embroidery has been cut in half at several of the big stores in anticipation of the big demand for summer frocks. Some of the regular dollar-a-yard fine white 18-inch robes may now be had at 25 cents.

Some Men Are Stupid. I heard a good story the other day.

"Porosknit"

Summer Underwear FOR MEN FOR BOYS

—naturally—the straightest way to comfort in warm weather. Meet Summer halfway—in "Porosknit"—the best way to keep cool.

Ask your dealer to show you this Label. It is on every Genuine "Porosknit" garment.

Every one who wears the genuine "Porosknit" likes it—because it fits as if it were made for you. Wears as if it cost twice as much—no better quality at any price. That's why there is such a demand for it.

MEN'S Shirts and Drawers, each 50c
BOYS' Shirts and Drawers, each 25c
Union Suits: Men's \$1.00; Boy's 50c.

HOLLYWOOD IN ANGRY MOOD.

Eastern Part of City Still Cries for Water.

Company Says It Is Turned on; Residents Deny It.

Live Stock, Gardens, and the Lawns Suffering.

SPECIAL CORRESPONDENCE OF THE TIMES.
HOLLYWOOD, June 2.—In spite of the fact that the Union Hollywood Water Company claimed that service had been renewed through its mains in East Hollywood at 2 o'clock this evening residents of that district interviewed at 10 o'clock, said that their faucets were still dry. At a late hour there was still no sign of the presence of water in the pipes.

Not a drop of water, it was said, has been supplied East Hollywood from the reservoir since last night at 10 o'clock, and there was only a dirty "dribble" in some other portions of the town.

Water has been carried miles today in small pails, and all irrigation of flowers and gardens was, of course, abandoned.

If the fluid is not turned on before tomorrow morning the Los Feliz school will have to close as a sanitary measure.

This morning the water company officials telephoned the City Trustee, asking that no sprinkling be done on the streets, and the request was complied with. The City Trustee's Home supply is also shut off.

The reservoir from which Hollywood gets water had just about two feet of liquid in it this afternoon. Castings were being rushed today at the fountain to replace the injured portions of the engine at Sherman, and the smaller engine at that place is being pushed down. The capacity of the plant is 250 inches. At the present time it is running at the rate of about 120 inches.

Last January the company had 1600 meters in Hollywood, and 1300 in the surrounding territory. This number has been greatly increased since that time. Many beautiful grounds have been laid out here, and all the wealth of flowers, lawns, and lawns which go to make this valley a place of beauty will have a serious setback which it will take months to repair unless irrigation can be resumed.

Live stock in the cut off section is already suffering.

Some soda fountains are doing a "land office business."

WOMAN'S CLUB ELECTS.

The following ticket was elected by the Woman's Club at its annual meeting today: President, Mrs. J. J. Steadman; vice-president, Mrs. E. F. Johnston; corresponding secretary, Mrs. C. E. Birney; recording secretary, Mrs. A. Schiess; secretary, Mrs. C. E. Mooney; for the board at large, Mrs. E. P. Roeder, Oliver Wood, F. M. Douglas and S. S. Phelps.

FOR COAST MARKETS.

GRASPING BIG OPPORTUNITIES.

LOS ANGELES MAN BUYS LARGE MEXICAN PLANTATION.

Twenty Thousand Acres of Rich Rubber and Fruit Producing Land Near Line of Harriman's New Road in Tepic, Becomes the Property of Local Mining Man.

Marshall P. Wright, a well-known mining man of this city, has bought a large plantation in Tepic, within three miles of Harriman's line down the west coast, for \$25,000. It contains nearly 20,000 acres of rich agricultural and grazing land. Tropical and semi-tropical fruits and products grow to perfection in that section, and Wright expects to devote a large part of the plantation to rubber and fruit.

The growing crops went with the place and include 1000 bearing rubber trees, eight years old, from which last year the first tapping produced over 300 pounds of commercial rubber.

Twenty thousand young trees are growing which will in a few years largely increase this output.

The purchase calls attention to the rapidly growing number of Americans who are acquiring large tracts of agricultural land in Mexico. This is particularly true of the west coast of Mexico. During the past year, the Harriman railroad is opening a section all the way from San Francisco to Tepic, and through Sonora, many companies, including several made up of men from this city, have taken over great areas and are putting them under irrigation and cultivation. The result of this has been to advance property values to such a point that in some places land has been bought for three or four years ago.

This statement applies to virgin ground, exclusive of improvement by irrigation or otherwise. As the railroad is completed farther south, Tepic is opening, and Jalisco and Durango are opening, tracts, usually held in large acreages, that could have been purchased a year or two ago for large sums of money, are rapidly increasing in value, and soon cheap lands in Mexico will be a thing of memory.

A large number of the purchasers of such lands outside them are turning to individual settlers in small tracts. Other forms of cooperative companies. In every instance, if properly handled, good returns are paid. Pineapples and bananas are staple crops. In Tepic to-day, the famous "San Andres Cuate" brand is raised and ready sale at fancy prices. There is a great chance for exportation of fruits and rubber.

Mr. Wright expects to make a commercial proposition of his land, and will export both pineapples and bananas on Pacific Coast points in the United States. Rubber he will handle through the usual channels, and in addition he will engage in cattle raising, having ample grazing ground for a thousand or more head of cattle. He will be in Los Angeles for a few days. He brought samples of the tobacco and rubber produced on the plantation.

The Buyer's Opportunity.

The man or woman who wants to purchase some of the best of the country should consider the fact that the country is in the hands of the United States. The man or woman who wants to purchase some of the best of the country should consider the fact that the country is in the hands of the United States.

JUSSERANDS.

(Continued From First Page.)

my western trip. I sought advice from one of my warmest friends at Washington, a man you also love and admire—Senator Flint. (Great applause.)

"He told me if I left out Los Angeles from the itinerary, I would lose one of the most interesting parts of the journey. Since I have seen your beautiful city, I know his words were true."

WONDERS AT VASTNESS.

"I have wondered at the vastness of this western empire. I have seen deserts transformed into blooming gardens and have witnessed the advance of the pioneers across the great plains. You Americans dig for water to irrigate your lands. If water didn't come, then you found gold. Even from brackish waters, you have made gold."

"I call this section an earthly paradise. I found much to admire in my rapid trip through high plateaus and lemon groves. I believe the worst lemon now has a new meaning on account of the increased tariff." (Applause.)

The Ambassador expressed his desire to a fair flower which is destined to bloom forever. He congratulated those present upon the opening of the Chamber of Commerce, and said many pleasant things about President Booth.

LASTING TIES.

In closing he spoke eloquently of the lasting ties of brotherhood which bind France and America. He said that this country stands for personal liberty and progress, and declared that the Frenchman feels a rough and ready water to irrigate his lands.

The Ambassador's address closed the exercises. The ladies gathered about Mrs. Jusserand as she left the hall and wished her a safe and happy journey northward. The Jusserands were taken to their private car which is parked at the Arcade Station. It was here early this morning for San Francisco.

RECEPTION AND DINNER.

Ambassador and Mrs. Jusserand were tendered a reception early yesterday afternoon by the Alliance Francaise at the handsome home of Mrs. L. N. Brunswig, No. 273 West Adams street.

Leut.-Gen. and Mrs. Adna R. Chaffee entertained last evening with dinner in honor of the distinguished visitors. Other guests were Maj.-Gen. and Mrs. Storey, Mr. and Mrs. Charles Modini Wood, Mrs. Hugh Livingston Macneil, Bishop and Mrs. Joseph H. Johnson, E. E. Huntington, Jr. and Mrs. Godfrey Holtzworth, Jr.

The table was decked with Los Angeles roses; the drawing-room was aglow with yellow candelabras, and pink sweet wills furnished fragrant adornment for the reception-room.

The French Ambassador and Mrs. Jusserand were visitors at the Soldiers' Home yesterday afternoon, escorted by a committee. The governor and his staff, as well as all the non-commissioned officers, had assembled at headquarters in anticipation of the call, and presented an imposing military picture. There was not time for more than a brief exchange of courtesies, as the distinguished party was already overdue. It was reported that at the bench, a brief run over the park in autos ended the visit. There were in the party Dr. and Mrs. William Edwards; the French Consul General, M. Durand, and wife, Willis H. Booth, president of the Los Angeles Chamber of Commerce, Gen. Frank C. Prescott, registrar of United States Land Office, Mayor Alexander of Los Angeles, Louis Sautou, Jr., and George Chaffee.

JAPAN'S HUGE DEBT.

Has Been More Than Tripled During the Past Thirty Years Because of Wars.

It seems incredible that a nation which in 1873 had a debt of \$23,846,321 should find itself today only thirty years later burdened with one of more than \$1,120,000,000. But such is the plight of Japan. At the close of the year 1928 the national debt of Japan amounted to \$1,120,585,000. And this is the way it grew:

The issuance of the public loan bonds in the fiscal year of 1873-74, amounting to about \$20,000,000, increased our indebtedness by one jump from 19 yen per head to 4.9 yen. The second great increase came with the Chinese War. In 1897 we found ourselves under the burden of an indebtedness of \$231,000,000. Then came the Russian War. The government met the extraordinary expenditure of this war by the flotation of exchange bonds five times in the years 1904-05. The first, second and third issues, amounting to \$240,000,000, bore interest at 5 per cent, and the fourth and fifth issues, aggregating \$100,000,000, interest at 6 per cent. These last two issues were redeemed in 1906 with the proceeds of the 4-per-cent, sterling loan of \$25,000,000, which was placed in London. Paris, New York and Berlin. This \$125,000,000 loan sold at 90 and is to run until 1920.

These domestic loans were, of course, utterly inadequate to meet the war expenditure. Therefore, the government placed abroad the will be a per cent loan amounting to \$22,000,000 sterling, pledging the customs duties of the empire as security. These loans have already been consolidated and redeemed. In March, 1906, the government floated the first 4 1/2 per cent loan of \$30,000,000. Half of this amount, which sold at 90 and which will run until 1918, was floated in London, and the other half in New York. This loan was secured by the first charge upon the net profit of the tobacco monopoly. The second 4 1/2 per cent loan, for the same amount was issued in London, New York and Berlin in July, 1906. It, like the first, was secured by the profits of the tobacco monopoly.

We do not know just who are holding these foreign loans or where they are held. Neither is there any way of knowing what proportion of them is held in New York. London, Paris, Berlin or the majority of our bonds are undoubtedly held in these four financial centers.—(From Adachi Kinoshita in Review of Reviews.)

Benjamin Clothes

WE CAN SATISFY the best dressed man in this city. If you will "watch our windows" we are sure you will agree with us that nowhere else can men's clothing be had that compare favorably with our showing of Benjamin's New York styles. They are absolutely right in every little detail—they fit perfectly, are thoroughly comfortable, hold their shape and wear well. All wool? Yes sir! Not a thread of cotton.

Suits \$20.00, \$25.00, \$28.00
\$30.00, \$35.00
and men marvel how such faultless clothing can be made to sell at such modest prices.

WEALTH AND WORTH WED.

St. Louis's Richest Girl Is Happy Bride.

Miss Fullerton Becomes Mrs. Paul Bakewell, Jr.

Her Choice of Self-made Man Is Realized.

(BY DIRECT WIRE TO THE TIMES.)

ST. LOUIS, June 2.—(Exclusive Dispatch.) Miss Mary Morgan Fullerton, St. Louis's richest girl, and Paul Bakewell, Jr., a young attorney of modest means, were married this evening at her home, No. 424 Westminster Place, by Rev. Father Matthew McKeeney, the bride having consented to the Catholic ceremony in deference to the bridegroom's wishes.

He is a grandson of Alexander McNaughton, the first Governor. The bride is the daughter of Gen. John Scott Fullerton, who was killed in a railroad wreck ten years ago, and is related to J. Pierpont Morgan. Her wealth in her own right is estimated at more than \$1,500,000, of which she came into full possession last August, when she stated she would not marry a title nor any man who had not earned his wealth.

Since that time she has been detained as an automobile speeder, and interviewed by the press recently.

Mr. Bakewell, then her fiancé, smashed a newspaper photographer's camera to prevent him taking the photograph of Miss Fullerton at court, in a lawyer's fee suit against her.

She is tall, with a mass of light-brown hair. The bride dress was of white satin, the corsage slightly draped in front and finished with point applique lace, edged with hand embroidery. Orange blossoms held the tulle veil in place. Her only ornament was a diamond bracelet, the groom's gift.

The couple left tonight without disclosing their destination. They are not to reside in her mansion, in deference to the groom's wish not to live at a home not his property, and will be at the Devonshire Hotel when they return. The bride passed to the altar on the arm of her cousin, John Stillwell, Chicago. Miss Dorothy Shaleigh was maid of honor, Miss Eleanor Fowler of New York City was a bridesmaid, Edward Bakewell, the groom's brother, was best man.

She is tall, with a mass of light-brown hair. The bride dress was of white satin, the corsage slightly draped in front and finished with point applique lace, edged with hand embroidery. Orange blossoms held the tulle veil in place. Her only ornament was a diamond bracelet, the groom's gift.

The couple left tonight without disclosing their destination. They are not to reside in her mansion, in deference to the groom's wish not to live at a home not his property, and will be at the Devonshire Hotel when they return. The bride passed to the altar on the arm of her cousin, John Stillwell, Chicago. Miss Dorothy Shaleigh was maid of honor, Miss Eleanor Fowler of New York City was a bridesmaid, Edward Bakewell, the groom's brother, was best man.

Mr. Bakewell, then her fiancé, smashed a newspaper photographer's camera to prevent him taking the photograph of Miss Fullerton at court, in a lawyer's fee suit against her.
